

## Change Default Joomla Search from "Any words" to "All words"

Contributed by Administrator  
Monday, 23 July 2007

Edit: /components/com\_search/search.php

At the top of the file around line 20 it should look like:

```
// page title  
$mainframe->setPageTitle( _SEARCH_TITLE );
```

Right after that add:

```
// all words default (modded by yourname)  
if($_REQUEST['searchphrase']=='') {  
    $_REQUEST['searchphrase']=$_GET['searchphrase']='all';  
}
```
